PROJECTS

[Movies Engine ↗](#)

Apr 2025 - May 2025

Movies Engine is a dynamic movie discovery application that fetches real-time data from The Movie Database (TMDB) API. It allows users to explore trending, popular, and upcoming movies with detailed information such as ratings, genres, and overviews. The app offers an intuitive interface for movie browsing, searching, and viewing detailed descriptions, helping users easily find films of interest.

Key Features:

- Search functionality with auto-suggestions
- Real-time movie data: trending, upcoming, top-rated
- Detailed movie pages with cast, synopsis, and ratings
- Responsive UI optimized for both desktop and mobile

Tech Stack:

React JS, Tailwind CSS, TMDB API, React Router

[todolist ↗](#)

Mar 2025

ToDoList is a smart task management application designed specifically for students to stay organized with their academic workload. It provides timely reminders for assignments, exams, and college events, helping users manage deadlines efficiently and avoid missing important tasks.

Key Features:

- Schedule-based reminders for assignments, events, and exams
- Push notifications for upcoming tasks
- Organized categories for better task tracking
- Future integration planned for WhatsApp/group message parsing using Python NLP
- Clean, mobile-friendly UI with responsive design

SKILLS

- | | | |
|----------------|--------------|----------|
| • HTML | • JavaScript | • CSS |
| • React | • Next.js | • Python |
| • Tailwind CSS | • GitHub | |

EXTRA CURRICULAR ACTIVITIES

- Tech Seminars & Workshops – Attended workshops on React, Git/GitHub, and UI/UX design, staying updated with the latest trends.
